Core Business

Furniture

Consumer

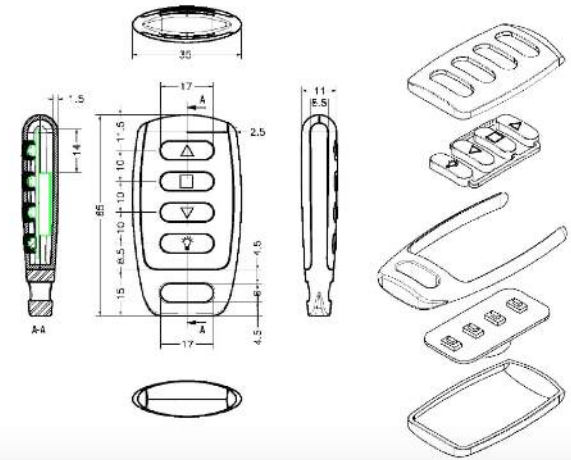

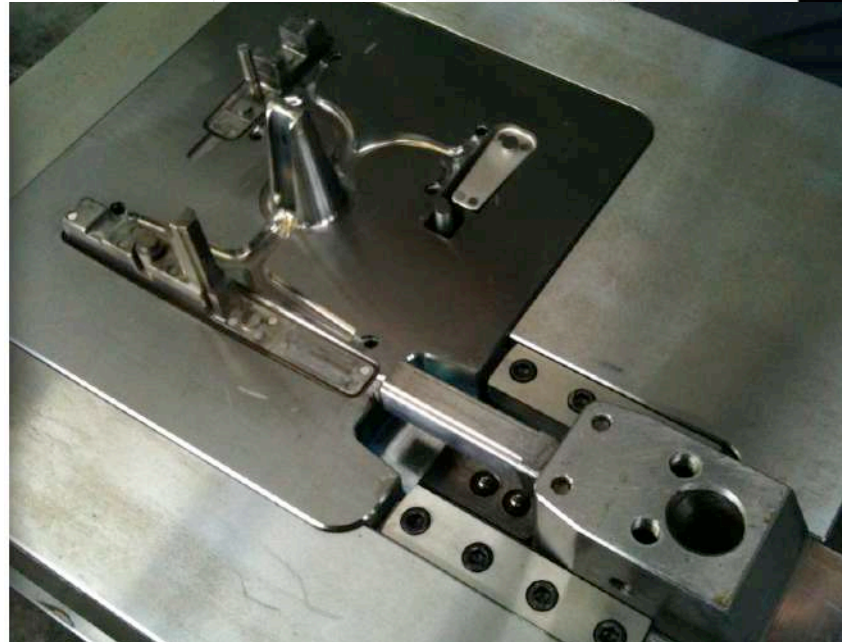

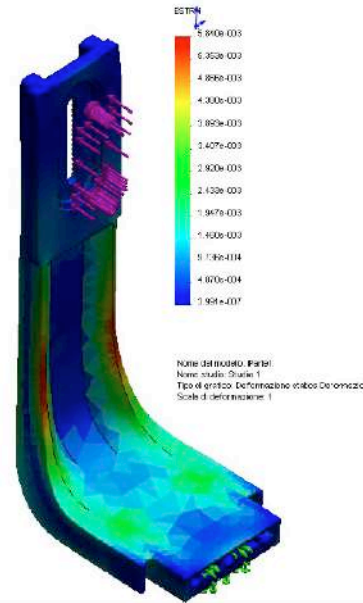

**Our core business is related to office design:
seats, furniture and partitions.**

About

Technical DNA

We have technical skills
in the mechanical industry,
plastic molding, die casting and extrusion.

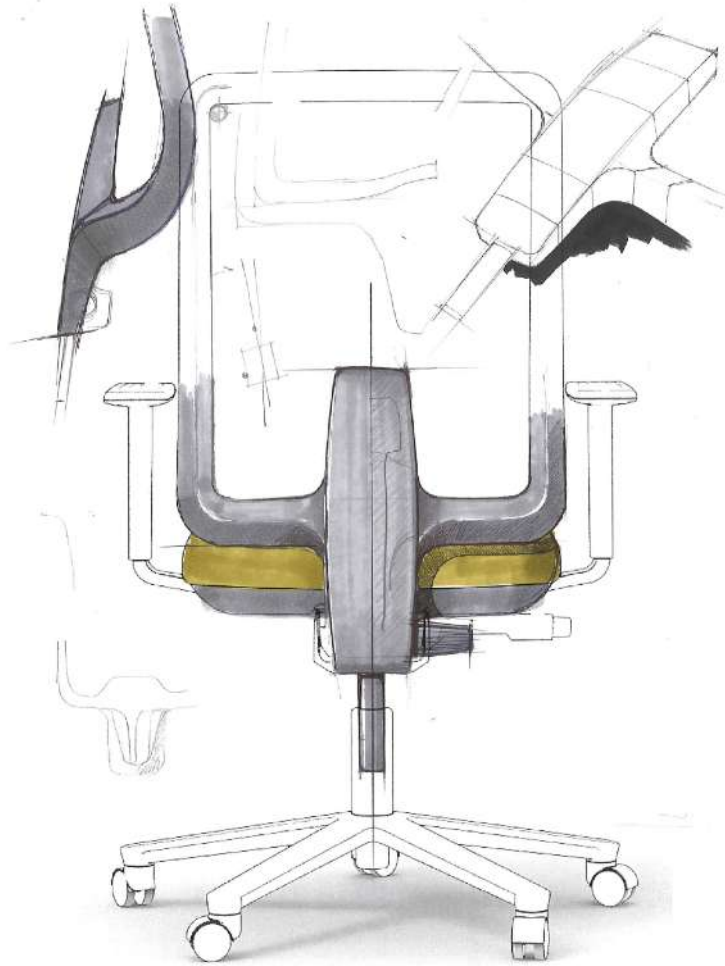

We are actively involved in all project phases

from the idea, to customer assistance in the process of production always finding the best solution, with a constant research of over-the-top-suppliers, technologies and new trends.

What We Do

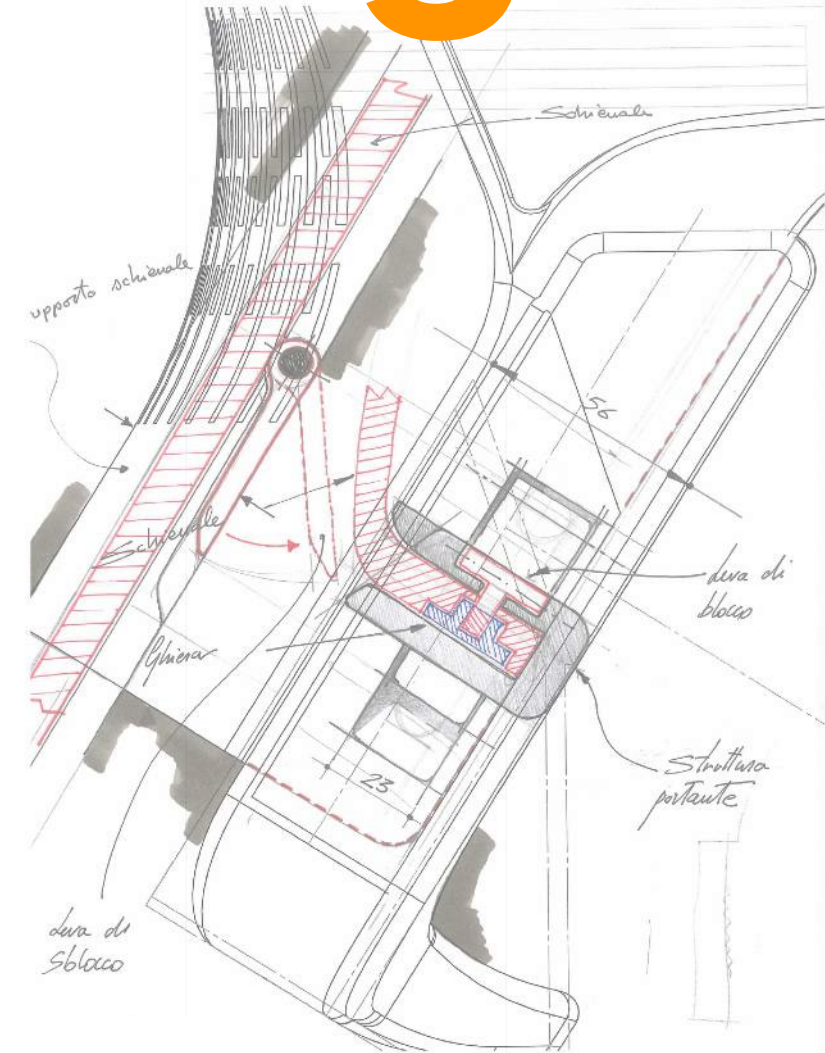

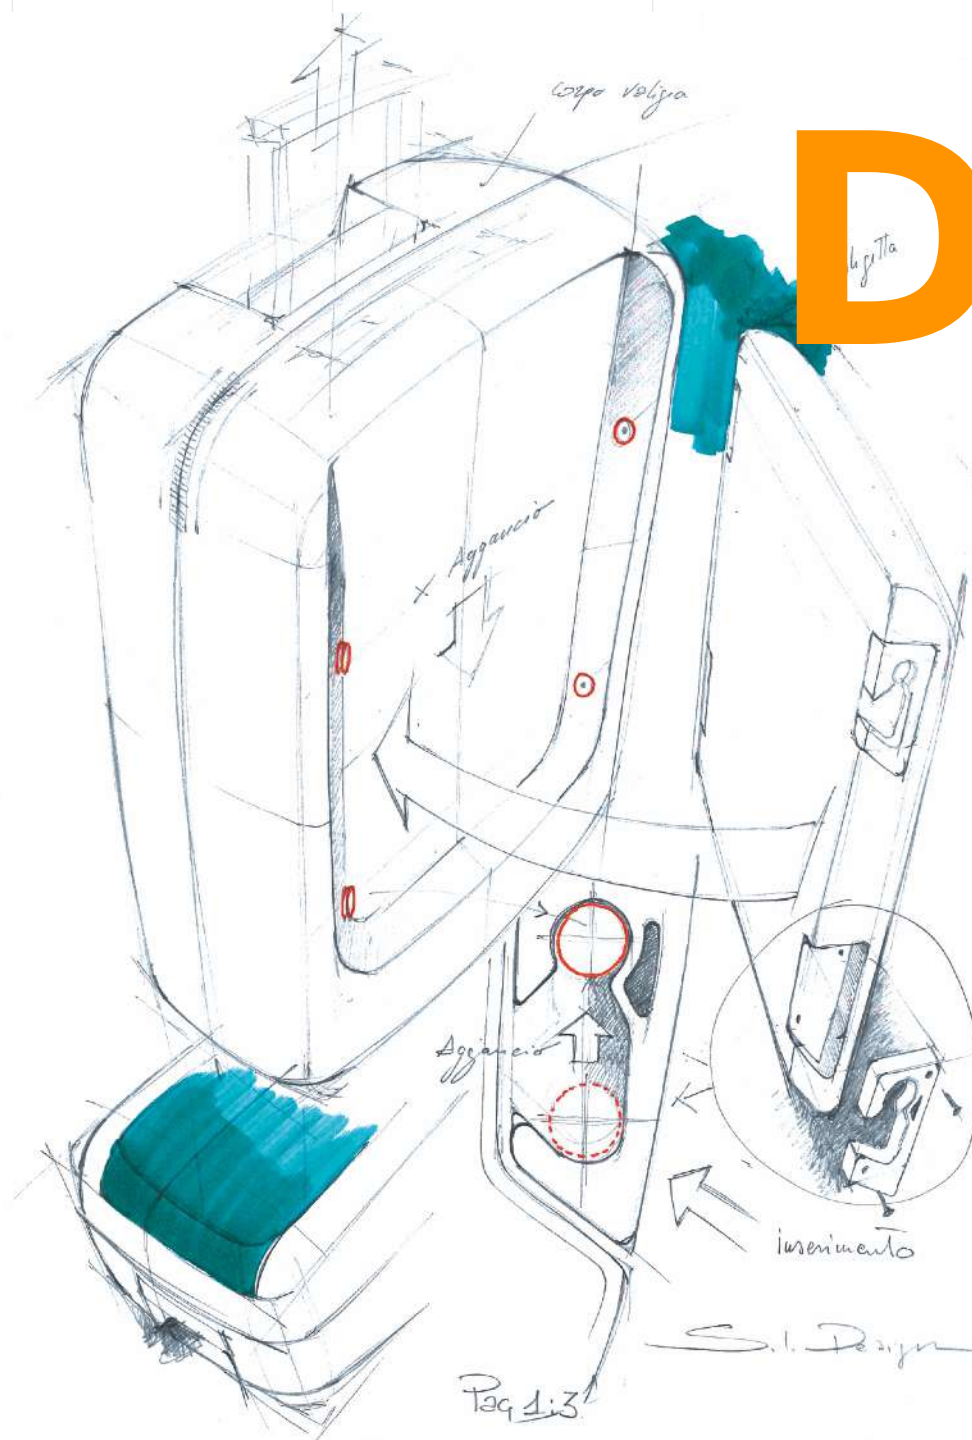

We

Design

What

Single products, range or systems with a distinct technical connotation.

We Industrialize

What

We industrialize with particular attention to production process and cost control.

We

What

We invest in prototypes and molds in addition to product design, because we try to get close as far as possible to the final ready-to-market product.

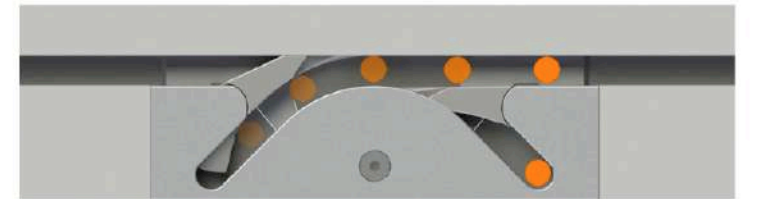

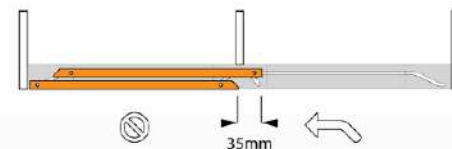

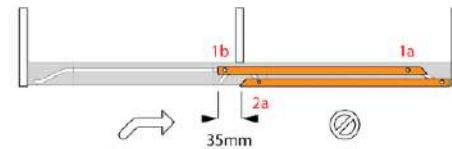

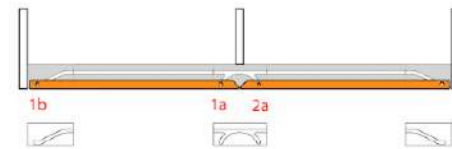

Prototype

We Patent

What

We carry out patents of industrial invention.

How

6 Steps

We divide project into phases so we can monitor together with customers the mutual achievement of milestones and goals.

1

Concept Design

Fast sketching and idea visualizations

2

2D + 3D + Render

Development of 3D mathematics, technical drawings and photorealistic rendering

3

Cost Analysis

Preliminary study of productions costs and investments

4

Technical Prototyping

Realization of the first prototypes with assembly simulations

5

Structural Calculations

Software analysis

6

Supply Chain

Research of suppliers, support to industrialization and final 3D maths delivery
